

# INOTAN B LIQUIDE™

## TANNINS

**Complex composed of condensed tannins (Québracho-based) and copper sulphate**

### ↘ OENOLOGICAL APPLICATIONS

L'**INOTAN B LIQUIDE™** is a preparation suitable for ageing wines.

The addition of tannin improves the structure of the wine, helping to stabilise colour and improve ageing potential. It also contributes to clarification.

The addition of copper sulphate attenuates the taste of reduction, which is often noticeable at the end of malolactic fermentation.

### ↘ INSTRUCTIONS FOR USE

**INOTAN B LIQUIDE™** is added to the wine during racking, either directly or by means of a fining connector.

This operation must be combined with sulphiting.

### ↘ DOSE D'EMPLOI

- 3 to 5 cL/hL

### ↘ CONDITIONNEMENT ET CONSERVATION

- 1 L, 5 L and 10 L

Do not reuse an opened bottle from one year to the next.

Store in a dry, well-ventilated, odour-free place at a temperature of between 5 and 25 °C.

Once opened, the product must be used quickly.
