

INOTAN B

TANNINS

Condensed tannins (based on Quebracho)

↓ OENOLOGICAL APPLICATIONS

INOTAN B improves the structure of the wine, helps to stabilise the colour and increases its ageing potential.

↓ INSTRUCTIONS FOR USE

INOTAN B LIQUID :

INOTAN B LIQUID in a 10% aqueous solution is added to the wine as it is being drawn off, either directly or using a fining connection.

The operation should be accompanied by sulphiting.

Stir the wine thoroughly after you have added the product.

INOTAN B POWDER :

Dissolve the **INOTAN B POWDER** in warm water, then add it gradually during pumping-over to obtain an even spread through the wine.

Continue the operation as above.

↓ DOSE RATE

• **INOTAN B LIQUID :**

3 to 5 cL/hL of **INOTAN B LIQUID**

• **INOTAN B POWDER :**

3 to 5 g/hL of **INOTAN B POWDER** during pumping-over with aeration or removal of solids.

↓ PACKAGING AND STORAGE

- 1 kg and 5 kg polyethylene aluminium laminate sachets
- 1 L, 5 L and 10 L

Do not re-use an open drum from one year to the next.

Keep in dry, well-ventilated premises, free from odours, at a temperature lower than 25 °C.

The optimum date for using **INOTAN B** in its original packaging is shown on the label.
