

# SULFITAMINE C™

## SULFUROUS PRODUCTS

Refer to the regulations in force for the maximum legal dose.

### ↘ OENOLOGICAL APPLICATIONS

**SULFITAMINE C™** is a solution based on ascorbic acid and potassium bisulphite.

**SULFITAMINE C™** has strong reducing properties. It therefore prevents enzymatic and non-enzymatic oxidation of the wine.

Its use during disgorging prevents premature ageing of the wine.

Overall, this product improves the wine's taste qualities by adding freshness.

### ↘ INSTRUCTIONS FOR USE

Add **SULFITAMINE C™** directly to the expedition liqueur and mix thoroughly.

### ↘ DOSE RATE

- 3 to 5 cL in the liquor expected for the dosage of 100 bottles.

### ↘ PACKAGING AND STORAGE

- 250 mL, 500 mL, 1 L

Store in a dry environment which is well ventilated at a temperature between 4 and 8 °C.

Once open, the product must be used quickly.
