

# SULFIVIN™ A 50

## SULFUROUS PRODUCTS

Maximum legal doses according to Annex 1B of Regulation EC 606/2009.

### ↓ OENOLOGICAL APPLICATIONS

**SULFIVIN™ A 50** is an ammonium bisulphite solution at 50 g/L of SO<sub>2</sub>.

**SULFIVIN™ A 50** is applied to the harvest:

- On must: In the must reception tank, to prevent oxidasic casse and all microbial alterations.
- For red wines: At vatting, during crushing for extracting and fixing colouring matter.

**SULFIVIN™ A 50** has the following properties:

- It prevents the development of microbic agents via its antiseptic role.
- It is a selective factor for yeasts by limiting the development of undesirable yeasts.
- By activating an antioxidant it plays a preventative role against oxidasic casse.
- It facilitates colour extraction by promoting extraction of anthocyanins contained in the skin.
- It enables colour fixation in red wines.

### ↓ INSTRUCTIONS FOR USE

**SULFIVIN™ A 50** addition must be followed by vigorous mixing. It is recommended to avoid putting **SULFIVIN™ A 50** in contact with metallic objects (iron, copper or aluminium).

### ↓ DOSE RATE

Up to 20 cL/hL depending on vinification conditions.
